

Home Learning Grid - Summer Term Week 2

Reading

Keep reading books you have at home daily- reading books more than once is always good!

Read instructions from board games you have available and pull out the different word types eg: imperative verbs, fronted adverbials etc

Get Creative

Design and make a mode of transport. Think about the challenges you face and select the correct material to build eg: boat needs to float, parachute needs to be light etc.

Create a quiz for your family members to complete. Think about a topic you could generate questions about eg: space, animals etc.

Design a statue to say thanks to the NHS and key workers that could be placed in the city centre.

Writing Creative writing time!

Use the planning format to carefully draft a creative story about your lunch coming alive.

Once thoroughly planned, write a very descriptive (lots of adjectives and adverbs) story. Please e-mail me your stories, as I'm sure they will be amazing!

This work doesn't have to be completed on the sheets-it's just to give you guidance!

Science

Marble Run Challenge

Construct a marble run in which the marble takes as close as possible to ten seconds to travel from top to bottom.

Copyright © Caroline Alliston 2018

You can look online for inspiration!

Maths

Measure area and perimeter of each room in your house. If you don't have a tape measure/ruler, you'll have to be imaginative and use what you can find...pencils, coins, books etc.

Use these measurements to find the difference in size between two rooms.

Get Active

Design a 'Joe Wicks' style dance/aerobics workout! Get someone in your family to video you/ record it yourself then challenge your family members to complete the workout.

PSHE & Life Skills

Think about qualities you like about a member of your family. Create an acrostic poem about them that will make that person smile! You could also do this about yourself....be positive!

Saturn Class
